Fire extinguisher Pz6 BOAT EDITION

Fire extinguishers from the BOAT edition are intended for additional extinguishing of initial fires of classes A and B on boats. They are characterized by a special anti-corrosion protection and an additional security solution of fixing the device to the support.

They are filled with foam (water + additives). They cause the effect of suppression (AFFF) and cooling (water).

Once the fire has been put out, a layer of foam is created which successfully prevents evaporation with a simultaneous cooling. In that way, a risk of fire reignition is reduced, which is equally important both when the boat is in the harbour or when it is at sea.

Fire extinguishers from the BOAT edition are available in the size of 1,8 litres or 6 litres, which enables the choice according to the size of the boat.

Catalog number **520013BE**

Specification

Device type	portable with CO2 cartridge
Type of extinguishing agent	foam AFFF
Fire class	ABF
Edition	Special Edition
Extinguishing electrical equipment under voltage	up to 1000V
Extinguishing media quantity	6 lit.
Workshop	CO2 - 60 g
Temperature range	0°C do +60°C
Device mass	11 kg
EN3 efficiency	34A 233B 40F
Efficiency according to Croatian rulebook	10 JG
Dimensions (diameter/height mm)	170 / 558
Standard	EN3
Directives	PED 2014/68/EU
